LIS 161 THU3 **Project Scope Statement**	**Prepared by:** Amira R. Blancaflor **Date:** September 10, 2019

General Project Information

      Project Name: Revival and Improvement on RUPP (Rate UP Professors)
      Sponsor:
      Project Manager: @himachizu (Twitter)

Problem/Opportunity Statement

      Many UP students have voiced out their frustration over the decision of the UP administration enforcing a cease and desist to the operation of the RUPP website. RUPP allows students to rate freely and anonymously the professors they've taken and provide reasoning for such. Although SET has been established for the same reason, students do not see the improvement and some professors seem to pointedly ignore the critiques they receive.

Project Objectives

      To help the students decide if the class they're enlisting to under a professor is worth taking or worth avoiding. It prevents the students to enlist in a class with a toxic professor and effectively prevents the students' mental health to suffer. It could also possibly prevent the students from being delayed.

Project Description

      In RUPP, the students can see the rating of the professor based on the easiness, pedagogy, and grading. The search bar of the website will be improved so that the user need not go back to previous page just to access the search bar. The project will acquire 2 or 3 more admins to help manage the website.

Business Benefits

      Improved user interface
      Useful tips for students
      Critiques on professors

Project Deliverables

      Website
      Application
      Reports

Estimated Project Duration

      3 months
